Network Power Switch

Power Protection for
Business Critical Continuity

We helped some of the largest names in the industry bring new capacity online faster and at a lower cost when search and social media increased demand for storage and computing.

We were the first to introduce an integrated enclosure system to distributed networks.

Our portfolio spans power, thermal and infrastructure management products, software and solutions.

Protecting your critical technologies takes more than just great software and equipment. It takes a level of experience that only comes from years of finding solutions when the industry needed them most. We were the first to protect mainframes with precision cooling systems.

And now as challenges and demands grow, we continue to find better ways to help you strengthen your most vital applications. Formerly the Network Power business of Vertiv, we've brought together the most trusted and experienced names in critical infrastructure.

Complemented by a network of nearly 250 service centers worldwide. It's a combination of experience and resources that allow us to better adapt to what's needed, anticipate what's next and continue to find solutions in ways other companies simply can't.

Intelligent static transfer switches

Network Power Switch - I, Network Power Switch - II

Ensures maximum reliability to critical loads by eliminating system failures that are caused by power distribution problems.

Network Power Switch - I

NPS-I R31 16, 32, 63 A Single Phase -1 Pole

Network Power Switch - I N

NPS-I R32 16, 32, 63 A Single Phase - 2 Pole

Network Power Switch - II

NPS-II FL3 60 to 400 A Three Phase - 3 Pole

Network Power Switch - II N

NPS-II FL4 100 to 300 A Three Phase - 4 Pole

FEATURES

Uses Power Semiconductors as Switching Element

It acts like protective barrier to the load. When power supply feeding to the load goes beyond the preset limits (Frequency or voltage) the switch instantly disconnects from load and protects it.

Independent Micro-controller

Makes it independent of source functioning and its control scheme. The smart control enables user to select the priority of source.

Simple & Rugged design

Low component count, giving high level of reliability.

User friendly display & Control

Display provides status of incoming power source and the condition of static switch.

Exceptional Performance

It is tailored to suit the requirements of different operating conditions. It tracks the Input Voltage, Phase & Frequency, Distortion levels at the terminal points. If these parameters are within the limits then depending upon the priority selection, it activates the respective switch. This ensures the power availability to the load

MODBUS RS 232/485 Interface (optional)

To connect your building Management System (BMS) for monitoring of all status & alarms

Potential Free contacts (optional)

For remote monitoring of the switch activity

The NPS-I & NPS-II switches allows instantaneous transfer of load between two power sources. It can be used to ensure complete redundancy of power supply upto the last piece of wire. It is useful in many applications, where redundant power supply is available, either from two UPS systems or one UPS and bypass source.

These switches are comprising of semiconductor switches, they ensure continuity of power to the load in the event of failure of one of the power sources. They have different user selectable parameters and in-built microprocessor.

NPS-II

Liebert® Network Power Switch

Power Protection for Business Critical Continuity

FUNCTION

In a typical connection (see diagram) two different power sources (UPS, Stabiliser, Power conditioner etc.) are connected to the critical load through NPS-I / NPS-II switch, which will intelligently monitor the power from the sources. Depending upon the preset limits, it will allow the power to be passed to the critical load & thus making it as the best solution for mission critical applications.

APPLICATIONS

- Data Centers
- Call Centers
- Process Control
- Automation

Liebert® Network Power Switch

Power Protection for Business Critical Continuity

Model	NPS-I R31			NPS-I R32		
No. of Switching Poles	1 Pole (Ph)			2 Pole (Ph + N)		
Nominal Output Current ⁽¹⁾	16 A	32 A	63 A	16 A	32 A	63 A
Nominal Voltage ⁽¹⁾⁽⁴⁾	220 / 230 / 240 V, 1 Phase (110 / 120 V optional)					
Voltage Tolerance ⁽²⁾	- 15% to + 10% (Default)					
Nominal Frequency	50 / 60 Hz, ± 2 Hz (Default)					
Efficiency ⁽³⁾	> 99%			>98%		
Overload Capacity	125 to 150% for 10 min., 150 to 200% for 1 min., 200 to 400% for 5 sec., 400 to 700% for 600 ms, >700% for 250 ms					
Duty	Continuous					
Protections	Input Under Voltage, Input Over Voltage, Output Overload, Output Short Circuit					
Transfer / Re-transfer Time ⁽²⁾	< 5 ms for Sync. condition					
	< 5 ms / < 15 ms (selectable) for No Sync. Condition					
Manual Bypass facility	Make before break					
Acoustic Noise Level ⁽⁶⁾	<45 dBA					
Operating Temperature	0 to 40° C					
Relative Humidity	Up to 95% (Non-condensing)					
Altitude	< 1000 meter, above sea level (without de-rating)					
Reference standard	IEC 62310					
Enclosure Protection	IP 20					
Cooling	Natural Cooling					
Dimension (in mm) WxDxH	440 x 450 x 132 19" Rack mountable, 3U Height					
Color	RAL 7021					
Weight (Approx)	15 kg					
Cable Entry	Rear Side					
LED Indications	Source 1 Healthy		Source 1 Feeding load		Source 1 Priority	
	Source 2 Healthy		Source 2 Feeding load		Source 2 Priority	
	Source 1 Fuse Fail		No Sync			
	Source 2 Fuse Fail		Alarm			
PFC ⁽¹⁾	Load on Manual Bypass - Source 1		Load on Manual Bypass - Source 2		Load on Static Switch	
	Source 1 Abnormal or Back Feed		Source 2 Abnormal or Back Feed		Alarm	
Other Features	• DSP Based control • Back feed protection • Inbuilt Static Switch fault detector • INSTAMON Software for monitoring all status & alarm (Optional)		• Hot Swappable Electronics static switching module • Fixed or variable source priority mode and selection of preferred source • Short circuit protection by electronic circuit			
Communication Interface (optional)	RS 232 or Ethernet Connectivity, RS 485 MODBUS					
Output Sockets	16 A	3 Outlets as per IEC320-C13 (Default) (Rating 10 A / 250 VAC)	or	1 Outlet as per IEC320-C19 (Optional) (Rating 16 A / 250 VAC)		
	32 A	6 Outlets as per IEC320-C13 (Default) (Rating 10 A / 250 VAC)	or	2 Outlet as per IEC320-C19 (Optional) (Rating 16 A / 250 VAC)		

(1) Factory setting (2) Settable from "Insta Mon Software" (3) Settable from "Insta Mon Software" as well as from "Operator control panel"

(4) Allowable source voltage distortion (THD) < 10% (5) For tolerance see IEC 60146-1-1 (6) Acoustic Noise Level from 1 meter (Ref. ISO 3746)V

Liebert® Network Power Switch

Power Protection for Business Critical Continuity

Model	NPS-II FL3				NPS-II FL4		
Ampere Rating	60 / 100 A	200 A	300 A	400 A	100 A	200 A	300 A
Input / Output	3 Phase				3 Phase		
No. of Switching Poles	3 Pole (Ph)				4 Pole (Ph+N)		
Nominal Output Current	60 / 100 A	200 A	300 A	400 A	100 A	200 A	300 A
Nominal Voltage	400 / 415 V (3 Ph + N)						
Voltage Tolerance	Low band : -30% to +15% (Default), Medium band : -25% to +15%, Narrow Band : -15% to +15%						
Nominal Frequency	Nominal : 48 - 52 Hz, Wide 40 - 70 Hz (Default)						
Efficiency ⁽¹⁾	> 98%				> 97%		
Overload Capacity	110% for 1 hour, 150% for 1 min, 1000% for 100 ms						
Duty	Continuous						
Protections	Input Under Voltage, Input Over Voltage, Output Overload, Output Short Circuit						
Transfer / Retransfer Time	Low Sensitivity : < 8 ms, Medium Sensitivity : < 5 ms (Default), High Sensitivity : < 3 ms						
Manual Bypass facility	Provided						
Acoustic Noise Level ⁽²⁾	< 60 dBA						
Operating Temperature	0 to 40° C						
Relative Humidity	up to 95% (Non-condensing)						
Altitude	< 1000 meter, above sea level (without de-rating)						
Testing Standard	IEC 62310 -3						
Enclosure Protection	IP 20						
Cooling	Forced Cooling						
Dimension (in mm)	- Width	800	800	1000	1000	800	1000
	- Depth	600	600	600	600	600	600
	- Height	1750	1750	1950	1950	1750	1950
Weight in kg (approx)		225	225	275	350	225	275
Color	RAL 7021						
LCD Display parameters	Source 1 R phase voltage	Source 2 R phase voltage			Output Load R		Date & Time
	Source 1 Y phase voltage	Source 2 Y phase voltage			Output Load Y		
	Source 1 B phase voltage	Source 2 B phase voltage			Output Load B		
LED Indications	Source 1 Healthy	Source 1 Feeding		Source 1 Priority		Sensitivity Low	
	Source 2 Healthy	Source 2 Feeding		Source 2 Priority		Sensitivity Medium	
						Sensitivity High	
Fault Indications	SPP, Overload						
Communication Interface	RS 485 Modbus (optional)						

(1) For tolerance see IEC 60146-1-1 (2) Acoustic Noise measured @ 1.0 meter as per ISO 3746
